

ANDROID DEVELOPER

FUNDAMENTAL

PRACTICAL JOURNAL

BY PRAKASH VIJAYAN MALWAD
SCS2324028

S.I.E.S College of Arts, Science and Commerce
Sion(W), Mumbai – 400 022.

CERTIFICATE

This is to certify that Mr. / ~~Miss~~. MALWAD PRAKASH VIJAYAN Roll No. SCS2324028 Has successfully completed the necessary course of experiments in the subject of **Android Developer Fundamentals** during the academic year **2023 – 2024** complying with the requirements of **University of Mumbai**, for the course of **S.Y. BSc. Computer Science [Semester-4]**

Prof. In-Charge

Prof. Maya Nair

(Android Developer Fundamentals)

Examination Date:

Examiner's Signature & Date:

Head of the Department

Prof. Manoj Singh

College Seal

And

INDEX

Practical No.	Title	Pg.no	Signature
1	Write an Android application with an TextView and Button. Onclick of the button the content of the TextView should toggle.	3	
2	Write an Android application with an Image View and Button. Onclick of the button the visibility of the image should toggle	5	
3	Write an Android application to accept two numbers from users and perform an arithmetic operation(Addition, subtraction, Multiplication and Division)as per user's choice using radio button. The result should be displayed in toast.	7	
4	Write an Android application with two activities namely MainActivity and SecondActivity. The username and password from MainActivity to be passed to SecondActivity and its validated and appropriate message is displayed.	11	
5	Write an android application to demonstrate Activity Lifecycle.	15	
6	Write an android application to demonstrate the use of Options Menu, Floating Context Menu and Contextual Action Bar Menu.	18	
7	Write an android application to implement implicit intent to show a web url, dialer and capture image with device camera.	25	
8	Write an Android Application to demonstrate broadcast and broadcast receiver.	28	
9	Write an Android Application to demonstrate notification from an app.	31	

Practical 1

Write an Android application with an TextView and Button. Onclick of the button the content of the TextView should toggle.

Code:

MainActivity.java

```
package com.mld.pract1;

import androidx.appcompat.app.AppCompatActivity;

import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.TextView;

public class MainActivity extends AppCompatActivity {
    TextView t1;
    Button b1;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        t1=findViewById(R.id.text1);
        b1=findViewById(R.id.button);
        b1.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) {
                String s1=t1.getText().toString();
                if(s1.equals("Hello World")){
                    t1.setText("Namaste");
                }
                else{
                    t1.setText("Hello World");
                }
            }
        });
    }
}
```

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <Button
        android:id="@+id/btn1"
        android:layout_width="130dp"
        android:layout_height="57dp"
        android:layout_marginBottom="288dp"
```

```
        android:text="@string/btText1"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent" />

        <ImageView
            android:id="@+id/img1"
            android:layout_width="313dp"
            android:layout_height="212dp"
            android:layout_marginBottom="68dp"
            app:layout_constraintBottom_toTopOf="@+id/btn1"
            app:layout_constraintEnd_toEndOf="parent"
            app:layout_constraintStart_toStartOf="parent"
            app:layout_constraintTop_toTopOf="parent"
            app:srcCompat="@drawable/nun" />

    </androidx.constraintlayout.widget.ConstraintLayout>
```

Output Screenshot:

Practical 2

Write an android application to toggle image in imageview such that on click of button will visible and again click the invisible.

Code:

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
xmlns:android="http://schemas.android.com/apk/res/android"
xmlns:app="http://schemas.android.com/apk/res-auto"
xmlns:tools="http://schemas.android.com/tools"
android:layout_width="match_parent"
android:layout_height="match_parent"
tools:context=".MainActivity">

    <Button
        android:id="@+id/btn1"
        android:layout_width="130dp"
        android:layout_height="57dp"
        android:layout_marginBottom="288dp"
        android:text="@string/btnText1"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent" />

    <ImageView
        android:id="@+id/img1"
        android:layout_width="313dp"
        android:layout_height="212dp"
        android:layout_marginBottom="68dp"
        app:layout_constraintBottom_toTopOf="@+id/btn1"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent"
        app:layout_constraintVertical_bias="0.867"
        app:srcCompat="@drawable/nun" />

</androidx.constraintlayout.widget.ConstraintLayout>
```

MainActivity.java

```
package com.mld.imgtoggle;

import androidx.appcompat.app.AppCompatActivity;

import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.ImageView;
import android.widget.Toast;

public class MainActivity extends AppCompatActivity {

    Button btn;
```

```

    ImageView iv;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        btn=findViewById(R.id.btn1);
        iv=findViewById(R.id.img1);

        btn.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) {
                if(iv.getVisibility()==View.VISIBLE)
                {
                    iv.setVisibility(View.INVISIBLE);
                    btn.setText(R.string.btText2);
                    Toast.makeText(MainActivity.this,"Image is
Invisible",Toast.LENGTH_SHORT).show();
                }
                else
                {
                    iv.setVisibility(View.VISIBLE);
                    btn.setText(R.string.btText1);
                    Toast.makeText(MainActivity.this,"Image is
visible",Toast.LENGTH_LONG).show();
                }
            }
        });
    }
}

```
